

So You Want to be a Field Biologist?

This course is targeted primarily at those senior technical pest control operatives working in food handling environments who aspire to be a Field Biologist.

It is the primary objective of this course that delegates will be encouraged to think about what they should know in order to fulfil this highly responsible technical role, and it will be presumed that they are already experienced pest controllers.

On completion of the course delegates will have a better understanding and appreciation of:

- The BPCA's Certificated Technical Inspector and Field Biologist qualifications.
- The scope and content of the standards to which the food industry has to work.
- The importance of understanding food manufacturing processes.
- The challenges of controlling pests in food warehouses.
- The QA role of the field biologist.
- Using pest monitoring data to help target control programmes.

..... and will be equipped with the knowledge of what they need to learn and know to fulfil the Field Biologist role successfully.

Cost Members £165 + VAT
 Non-members £195 + VAT

The course fee includes all course materials, tea/coffee and lunch.

The course has been awarded 8 BASIS CPD points.

Cancellation

Cancellations can only be accepted on receipt of written instruction and are effective from the date received by the BPCA. Charges will be applied as per the table below:
